Portable payment system \$399 (plus \$199 annual subscription)

HERE'S a handy invention for tradies and anyone else with an out-and-about business. Install MiniMint software on fancy mobiles such as a Nokia N85, BlackBerry Bold or HTC Touch for accepting on-the-spot cash, credit-card, cheque and account payments from customers. Add a \$399 printer and card reader (paired via Bluetooth to your phone) for swiping cards and printing receipts on the spot. The owner can decide who pays a 99c transaction fee and their bank's merchant fee.
